### Endometrial Hyperplasia

#### Classification

- The 2014 WHO/ISGyP simplified the classification of hyperplasias to:
  - Hyperplasia without atypia.
  - Atypical hyperplasia (AH). Atypia refers only to cellular atypia.
- The traditional distinction between simple and complex endometrial hyperplasia is no longer included as it was not prognostic, although complex atypical hyperplasia (CAH) is used here when referring to studies preceding the current classification.
- The term 'endometrial intraepithelial neoplasia' (EIN) has also been applied to endometrioid carcinoma precursors and is included in the 2014 WHO classification as an alternate designation for atypical hyperplasia.
  - EIN is defined by: (1) a gland to stroma ratio of >1:1; (2) epithelial cells that differ cytologically from
